Crie um sistema de codificação para os vouchers e escolha o tipo, se será um desconto percentual ou em reais, ou até mesmo uma quantidade de kWh. Pode ser alguma promoção, brindes, etc.

Antes de fazer o cadastramento do carregador na plataforma de gestão é necessária a instalação e configuração do dispositivo no Aplicativo Alumbra Vivax.

Segundo a NBR 17019 o uso dos componentes acima é obrigatório para a instalação de estações de carregamento:

- Disjuntor curva C;
- DPS Classe II;
- IDR Tipo A

Os três esquemas acima podem ser realizados para a energização do equipamento, faça de acordo com a rede elétrica da edificação.

Antes de ligar a alimentação do dispositivo, é necessário a utilização da rede ethernet para a conexão com um servidor OCPP.

OBS: O IP deve ser distribuído de forma dinâmica (DHCP), pois não é possível configurar um IP fixo no carregador.

O cabo deve ser conectado na PCI-B que fica fixada na tampa inferior.

> Após conectado, basta ligar a rede elétrica e prosseguir.

Após a alimentação feita com as devidas proteções Alumbra Vivax.

Essa é a tela inicial do carregador que mostra algumas medições em tempo real e dados de carregamento.

Renomeie o carregador conforme desejar.

Para que a conexão com o servidor OCPP funcione a função "Carregamento inteligente" deve estar ativa.

Deve ser exatamente isso para se conectar a plataforma.

Dispositivo: Esse nome pode ser escolhido conforme desejado, porém deve ser o mesmo nome colocado na plataforma quando cadastrado esse carregador.

Reinicie o carregador e o mesmo está pronto para uso.
